Naumaan Faridi

701 Crossroad Ct Sw, GA 30127 | (404) 984-4487 | faridi.naumaan@gmail.com | U.S. Citizen

Objective

Second-year Computer Engineering student at Georgia Tech specializing in Systems & Architecture, seeking a Software Engineering internship for Summer 2026. Passionate about developing high-performance software through deep understanding of operating systems, computer architecture, and system-level design.

Education

Georgia Institute of Technology | Atlanta, GA *January 2026 – Present*
Bachelor of Science in Computer Engineering Expected Graduation, May 2028

University of Georgia | Athens, GA *July 2024 – December 2025*
Transfer with 75 Credit Hours, GPA 3.78

Skills

Programming: Java, Python, C, C#, JavaScript, SQL, React.js
Software: Android Studio, Spring Boot, JavaFX, GitHub
Professional Organizations: Institute of Electrical and Electronics Engineers
Communication: Design proposals, technical reports, instruction manuals, presentations (large and small audiences)
Languages: Hindi (fluent), Spanish (proficient), English (fluent)

Experience

Cricket Wireless | Orlando, FL *May 2024 – July 2024*
Back Office Assistant

- Audited inventory in the back-office system against physical stock to maintain accurate records and avoid discrepancies
- Reconciled daily cash, credit, and debit sales to ensure balanced registers at closing

Projects

CampusFix *Spring 2026*

- Built an Android issue-reporting app in Java using Firebase Auth, Firestore, and MVVM architecture with role-based access control and a defined issue status lifecycle.
- Integrated external APIs, real-time analytics charts, issue upvoting, and offline error handling

Local Explorer *Spring 2025*

- Built a JavaFX desktop application that displays real-time weather, local news, and event listings based on user input
- Connected to OpenWeatherMap, NewsData, and Ticketmaster APIs using multithreaded calls to fetch and display data

iTunes Media Gallery *Spring 2025*

- Developed a JavaFX application that queries the iTunes Search API and displays a gallery of 20 images based on user search terms and media type
- Leveraged multithreading to download images concurrently and update the progress bar without freezing the UI

Relevant Coursework

Objects & Design: Programming methods for dealing with large programs. Focus on quality processes, effective debugging techniques, and testing to assure a quality product.
Data Structures: Computer data structures and algorithms in the context of object-oriented programming. Focus on software development towards applications.

Activities

City of Refuge | Volunteer *July 2024 – August 2024*

- Assisted with warehouse operations, including organizing donations and sorting items for distribution
- Prepared, packaged, and distributed meals to low-income neighborhoods, serving an average of 50+ meals per distribution day

UGArden | Volunteer *August 2025 – December 2025*

- Harvest crops weekly and assist with processing produce to prepare for community distribution
- Clean and maintain farming tools and equipment to ensure safe and efficient operations

Books for Keeps | Volunteer *August 2025 – December 2025*

- Pack an average of 300 books per day into boxes for storage and delivery to schools and community members
- Sort and organize donated books by category and condition to prepare them for distribution
